

SPRA AWARDS 2023

AWARD CATEGORIES

BEST DETAILING

This will be awarded to a project that demonstrates innovative solutions to complex detailing and an outstanding finish. Describe how single ply roofing technology was used to overcome the challenges that were faced. Provide high-resolution CAD drawings, hand sketches, and close-up photographs that illustrate not just the result, but the design and installation processes too.

OUTSTANDING CONTRIBUTION TO THE SINGLE PLY ROOFING INDUSTRY

This will be awarded to a person who has provided outstanding service to the single ply roofing industry over a minimum period of ten years. It is open to all roles. Persons must be nominated by at least two current or ex-colleagues who must explain in detail why their nomination would be a worthy winner.

BEST NEW BUILD

This will be awarded to a project that represents an outstanding example of single ply roofing technology and workmanship. Describe why the single ply roofing system(s) was/were specified to fulfil the client and designers' performance requirements and how it/they complement(s) the architecture. Provide high-resolution aerial and close-up photographs and video footage to illustrate the result.

SUSTAINABILITY AWARD

This will be awarded to a project that minimised carbon emissions and materials and water consumption during construction and/or encourages biodiversity, harvests rainwater, and/or sequesters carbon in use. Describe the single ply roofing specification and how the project was managed to achieve targets. Provide data to support claims and high-resolution photographs to illustrate the result.

BEST REFURBISHMENT

This will be awarded to a project that represents an outstanding example of how single ply roofing technology and workmanship can be used to overlay or replace an existing roof. Describe how single ply roofing technology was used to overcome the challenges that were faced. Provide high-resolution aerial and close-up photographs to illustrate the result.

HEALTH AND SAFETY AWARD

This will be awarded to—

- Either an organisation that exhibits a culture that proactively nurtures the positive mental health of its employees and subcontractors. Describe how the culture was developed, how it is managed proactively, and what training is provided to employees and subcontractors. Provide factual evidence.
- Or a project where safe systems of work were implemented to control hazards, manage risks and/or where innovative products were installed to facilitate safe working. Describe the hazards and risks and how they were controlled and managed, respectively. Provide statistics where applicable.

BEST SMALL PROJECT (AREA ≤ 100M²)

This will be awarded to a project that represents an outstanding example of how single ply roofing technology and workmanship can be applied on a smaller scale. Describe why the single ply roofing system was specified, how challenges were overcome, and how health and safety were managed. Provide high-resolution, close-up photographs to illustrate the result.

COMPETENCE AWARD

This is a closed award. In recognition of their achievements, it will be presented to each operative who completed a SPRA Specialist Applied Skills Programme (SAP) or SPRA On Site Assessment Training (OSAT) course before the end of 2022. Those operatives participating in a current SPRA SAP or SPRA OSAT course will be acknowledged too.

PLEASE NOTE

Projects may be submitted by SPRA members only. Projects must be submitted via the form on the SPRA website. There is no limit on the number of projects that members may submit. Projects may be submitted for consideration for a maximum of two award categories.

The deadline for submissions is Sunday 30 April 2023.
